HANDLING & STERILIZING

ALLVIEW RETORT OPERATOR INTERFACE

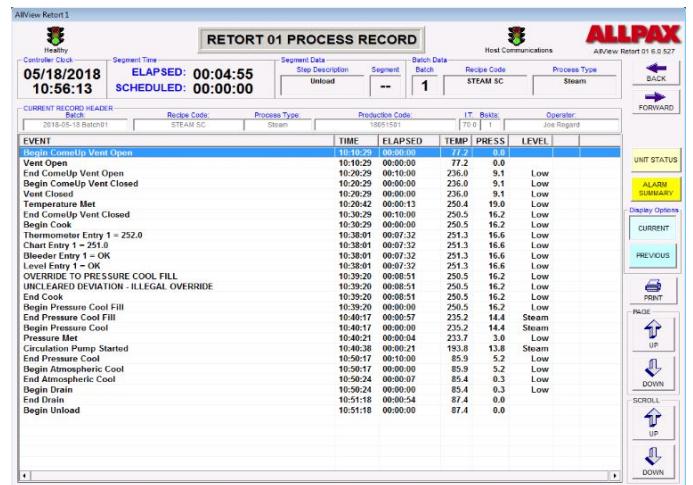

The Foundation of Every Retort Control System

The Allpax operator interface allows the plant to execute flexible control of their equipment. Configurable pushbutton operation combined with features including security levels, advanced diagnostics, process parameters, and manual overrides provides a control center that can be utilized by plant machine operators, maintenance, and production management. The integrated logging engine displays critical events in a process and provides a customized batch record that meets or exceeds 21CFR Part 11 electronic record keeping regulatory requirements.

FEATURES AND BENEFITS

- Recipe and process selection on 15" color touchscreen.
- PID Loop tuning
- Manual Override functions
- Retort process step overrides
- Preventative maintenance through Allpax "Maintainer"
- Manual and semi-automatic routines for automation
- Dynamic trending of retort critical factors

FDA/USDA Accepted Comprehensive Retort Control Interface
